

An Invitation to Participate....

The Federation of Earth Science Information Partners ("Federation") is pleased to offer you the opportunity to participate in its technology exhibition and workshops. Held in conjunction with the Federation's semi-annual meeting on August 18, 2004, the Technology Exhibition and Workshops provide your company with access to the decision makers of some of the nation's pre-eminent Earth science research, educational and technology organizations. Exhibit your company's products to key federal agencies, universities and innovative companies who work with vast data sets generated by satellites and other data sources.

Jack Dangermond, President of ESRI, will be our featured speaker on August 18. In addition, we are organizing a series of technical workshops that offer users insight into the latest technology and software available. Our overall meeting will focus on using technology to advance science through collaborations and we invite you to present your technology offerings to our members. Visit www.esipfed.org/ to view the latest agenda.

We offer several exhibit options for your company:

- For \$300, your company receives an 8' table in the exhibit hall, electricity and a high-speed wireless Internet connection.
- For \$400, your company receives an 8' table in the exhibit hall, electricity, a high-speed wireless Internet connection and a 30 minute workshop presentation.
- For those who cannot come to Asheville, we offer a special opportunity for you to sponsor the Federation.

- Company-sponsored luncheon or reception (call for cost details).
- Your company's logo listed on the Federation website (6 months-\$450; 1 year-\$700).

In addition, your company will be featured prominently on the Federation meeting website both pre- and post-meeting. Call the Federation office at 877.870.3747 to learn more about this opportunity.

The Federation's technology interests span the following topical areas:

- GIS
- Data Services & Interoperability
- Web Services
- E-Commerce
- Search Engines
- Visualizations
- Remote Sensing
- Grid Computing
- Data Storage Technologies
- High Performance Computing

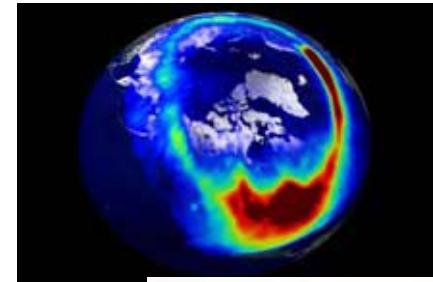

Whether your company provides software, hardware, security or other technology products, the Federation is a gateway to accessing a community of leading-edge developers and users of advanced technology. The Technology Exhibition and Workshops will be part of a larger offering of Technical Workshops intended for Federation members.

ESIP FEDERATION 2004 TECHNOLOGY WORKSHOP & EXHIBITION

Advancing Science Through Collaboration

About the Federation...

The Federation is the forum for users of satellite and other remotely-sensed data to come together. Serving as a voice of Earth science, the Federation represents more than 70 of the most pre-eminent governmental, scientific, educational and corporate organizations who are concerned about maintaining a healthy and safe planet. The ESIP Federation consists of: science data centers, researchers, science applications developers, educators and technologists. With all of these groups working together, the Federation leverages expertise, talent and precious resources through unique collaborations. These collaborative interactions result in innovative solutions to some of our planet's most pressing problems.

At the core of our work is satellite-generated data. Not constrained by the traditional uses of this data, the Federation encourages new and innovative applications for the wealth of data being generated by satellites and other sources. The Foundation for Earth Science (hereafter "the Foundation") is a 501(c)(3) non-profit organization created by members of the Federation. The Foundation facilitates the work of the Federation and its committees by providing on-going professional staff support, strategic planning, fundraising and grant management.

Together, the Federation and the Foundation have become important advocates for the Earth science information community and a catalyst for the application of remote sensing generated Earth science information to real world problems. Moving forward, the two organizations will work hand-in-hand to make the case for increasing the amount of emphasis on Earth science needs and applications.

Federation Technology Exhibit and Workshops

August 18, 2004
8:30 am – 3 pm
Renaissance Asheville Hotel
Asheville, North Carolina

Exhibitors are provided the following:

- 8' long table
- Free Wireless Internet Connectivity
- 30-minute workshop opportunity to fully detail the functional capabilities of your product or service (if option selected)
- Interaction with leading public, educational and private technology organizations
- Free admission to the Federation Meeting for 1 member of your group. (Additional admissions are \$150/person.) The meeting runs August 16-18, 2004. See <http://www.esipfed.org> for more information.

How to Apply for Space

1. Complete the Application on the final page of this brochure.
2. Include payment for your exhibit space and workshop opportunity.
3. Mail your application and payment to:

Carol Meyer
Foundation for Earth Science
300 Killington Drive
Raleigh, NC 27609

or fax your application with credit card payment to 919.870.7141. The deadline for Exhibit and Workshops Registration is June 30, 2004.

Space is limited and is assigned on a first-available basis.

For further information, contact:
carol.meyer@earthsciencefoundation.org or
877.870.3747.
